

# List of Figures

<b>Fig. 1.1</b>	From smart city vision to smart accoutrements.	4
<b>Fig. 1.2</b>	The scaling of computing from the 1950s to the 2020s.	12
<b>Fig. 2.1</b>	A ‘could-be-anywhere’ smart city.	28
<b>Fig. 2.2</b>	Data misuse is not our friend advertisements in Sydney, Australia, 2018.	33
<b>Fig. 3.1</b>	The <i>Ubiquitous Cities</i> cross-scale design framework.	59
<b>Fig. 3.2</b>	Cyber-physical system diagram that connects physical components and computational elements using sensors and actuators.	62
<b>Fig. 3.3</b>	Assembling an urban technology prototype using an Arduino microcontroller in the <i>Ubiquitous Cities</i> design studio in 2018.	64
<b>Fig. 3.4</b>	Final prototype for <i>Urban Scribe</i> by Jake Coppinger in the <i>Ubiquitous Cities</i> design studio in 2016.	65
<b>Fig. 3.5</b>	Iterative prototype for <i>Urban Scribe</i> by Jake Coppinger in the <i>Ubiquitous Cities</i> design studio in 2016.	66
<b>Fig. 3.6</b>	Scale model prototype of <i>Residue</i> by Charlotte Firth and Matthew Trilsbeck in the <i>Ubiquitous Cities</i> design studio in 2016.	67
<b>Fig. 3.7</b>	Electronics concealed in the scale model prototype of <i>Residue</i> by Charlotte Firth and Matthew Trilsbeck in the <i>Ubiquitous Cities</i> design studio in 2016.	67
<b>Fig. 3.8</b>	<i>Colourised Neurons</i> urban technology prototype by Orchha Pheap, from the <i>Ubiquitous Cities</i> design studio, 2022.	69
